GROUNDING INSTRUCTIONS.

This appliance must be connected to a grounded wiring system. If it should malfunction or break down, grounding provides a safe path of least resistance for electrical current, reducing the risk of electrical shock. The cord for this appliance has an equipment-grounding conductor and a grounding plug. It must only be plugged into an outlet that is properly installed and grounded in accordance with all local codes and ordinances.

⚠️ WARNING: Improper connection of the equipment-grounding conductor can result in a risk of electrical shock. Check with a qualified electrician or service person if you aren't sure if the outlet is properly grounded. **DO NOT MODIFY THE PLUG.** If it will not fit the outlet, have a proper outlet installed by a qualified electrician. This appliance is designed for use on a nominal 120-volt circuit, and has a grounding attachment plug that looks like the plug in the drawing above. Make certain that the appliance is connected to an outlet having the same configuration as the plug. **No plug adapter should be used with this appliance.**

You'll find assembly and operating instructions, safety precautions, as well as maintenance and troubleshooting instructions. Please read this Guide thoroughly before assembling your cleaner.

Pay particular attention to the product diagram, assembly instructions, and part names. Locate and organize all parts before assembly. Familiarize yourself with the parts and where they go. Following this User's Guide will greatly enhance your ability to get the most performance from your BISSELL QuickSteamer for many years.

Your QuickSteamer comes in two, easy to assemble components.

Lower Body

How To Put It Together

Refer to Assembly Diagram on page 4

1. Attach Handle to Lower Body

Slide Handle Assembly (with attached Quick Release Cord Wrap™) down into Lower Body until it will go no further.

2. Secure with screw

Secure by placing one (1) Phillips head screw (supplied) into rear of Handle Assembly. Tighten with screwdriver until secure.

Other Components

Clean Water Tank - holds 1/2-gallon of hot water cleaning solution.

Dirty Water Tank - holds 1/2-gallon of dirty water.

Power Cord - Secure Power Cord around upper and Lower Cord Wraps, and secure Plug to Cord with molded clip

How to use your BISSELL QuickSteamer

How to begin

1. Plan activities to give carpet time to dry.
2. Remove easily moved furniture (chairs, lamps, coffee/cocktail tables, etc.) from room if needed.
3. Vacuum carpet thoroughly.
4. Decide where to begin — and end — your job. Clean in 3' X 4' sections, starting in areas farthest from exit. Plan to leave a path open to empty soiled water and refill cleaner.
5. Carpeting will dry in three to four hours, depending on carpet style and air circulation in room. A floor fan speeds drying.
6. Replace furniture on damp carpeting by placing waxed paper under legs until floor dries completely.

Getting ready

1. Remove the Clean Water Tank by lifting it straight up, then away from the Lower Body.
2. Using the Formula Measuring Cap, add two (2) capfuls of BISSELL® Fiber Cleansing Formula™ to the Clean Water Tank. Add 1/2-gallon of hot (NOT boiling) tap water. Fill only to fill line – do not overflow.
3. Replace & turn Formula Measuring Cap clockwise until secure.
4. Place Clean Water Tank on Body.
5. Rotate Quick Release Cord Wrap™ and plug in.
6. Turn Power Switch [back of Lower Body] to (I) ON.

If cleaner starts when first plugged in, switch cleaner OFF (O) until ready for use.

⚠ WARNING:
Use only BISSELL Fiber Cleansing Formula™ or Floor Cleansing Formula™ in your QuickSteamer.™ Use of cleaning formulas that contain lemon or pine oil may damage this appliance and void warranty. Chemical spot cleaners or solvent-based soil removers should not be used. These products may react with the plastic materials used in your QuickSteamer,™ causing cracking or pitting.

Tip:

Always vacuum thoroughly before you deep clean. If possible, move larger furniture to an area you will not be cleaning.

Pre-Treating (Optional)

Pre-treat stubborn stains and highly soiled carpet in hallways and other high-traffic areas.

1. Spray soiled area with BISSELL® Tough Stain PreCleaner.™
2. Use a stiff-bristled brush to work formula into carpet pile.
3. Wait 3 -5 minutes before deep cleaning.

Tip:

Deep cleaning spots, spills and high traffic areas on a regular basis can prolong carpet life.

Deep Cleaning

1. Turn Power Switch [back of Lower Body] to (I) ON.
2. With foot, press the Detent Pedal on right side of Lower Body.
3. Depress Trigger to spray cleaning solution. Do not overwet.
4. Repeat motion over same area without depressing Trigger.
5. Repeat Steps 3 and 4 until no more dirt can be removed.
6. Continue to clean entire carpet, working in 3' x 4' sections.
7. Empty the Dirty Water Tank when dirty water reaches the full line, or when the Clean Water Tank is empty.
8. If Floor Nozzle stops spraying, turn Power Switch to OFF (O) and check water and cleaning solution levels. Refill if needed.

Tip:

Deep cleaning carpeting regularly can reduce dust and allergens in your home.
